

Settings

To configure Gobachi Smart Player go to settings, press OK to enter the settings of the device. You will see different settings tabs giving different settings for the device (see image below).

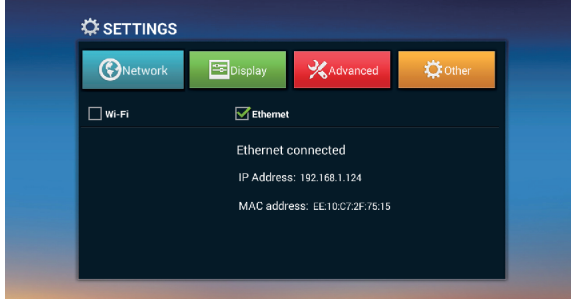

Connect to Wi-Fi

To configure Wi-Fi settings, go to Network menu and select "More Settings" option. A new window will open. Select Wi-Fi checkbox. A list of available access points (AP) will be displayed in the below window. Select the AP you want to connect with. A new window will pop-up asking for the password for the selected AP. If right password is provided it will connect to the AP. A new icon will be displayed in the home screen indicating that your device is connected through Wi-Fi.

Connect through Ethernet

Gobachi Smart Player can also be connected to the network using the internet cable (Ethernet). To connect through Ethernet, simply plug-in the Ethernet cable in the RJ45 jack provided on the input interface provided on the device. Then go to settings > Network. You will see two options Wi-Fi and Ethernet. Select the Ethernet checkbox. Status below will provide you the detail about the connection and IP etc.

Troubleshooting

Warning

Never try to repair the device by yourself as this will void the warranty for the device. Do not open the box as it may result in electric shock. If your device is not working properly please check the instructions provided below before taking the box for repairing. If the problem still remains unsolved please consult the local dealer for help.

Problem	Solution
No signal on the TV	1) Check if the device and TV are properly connected through HDMI/ AV cable. 2) Check if you have selected the correct input source on your TV.
Can not turn on your Smart Player	1) Check if the power cable is properly plugged in the DC socket of your Smart Player. 2) Check if the power supply is stable.
Can not connect to network	1) Check if the network is available on some other device. 2) Check if the password provided for the AP is correct or has been changed for the AP. 3) If IP settings are required for the connection, make sure that the settings have been properly made.
Remote Control does not respond	1) Make sure the batteries are good. 2) Make sure the distance between the remote control and your Smart Player is less than 8 meters.
Part of the screen is not visible on the TV	Go to settings> Display> Display Position and configure the device properly to show all of the contents of the Smart Player on the TV.

Warranty

The warranty provided for Gobachi Smart Player is valid for a period of twelve (12) months from the date of original delivery to buyer, the product manufactured by the seller are warranted to be free from functional defects in materials and workmanship, provided they are operated under conditions of normal use. Third party software included are warranted only under the warranty provided by such third party manufacturer for such software.
